

**SPECIFICATION LISTING (MARKED UP)**

Please replace the paragraph located at page 11, lines 14-21 with the following paragraph:

In a preferred embodiment the level sensing assembly 22 comprises a plurality of thermistors 24 positioned in the sump pit 2. Each one of the plurality of thermistors 24 changes resistance when in contact with water. Thus, the level of water in the sump pit 2 is determinable. Other types of level sensors may be used, however contact type sensors may not ~~by not~~ function properly with debris or contaminated water, and float type systems may stick and not operate properly, especially after prolonged dry periods.

**AMENDED DRAWINGS (CLEAN SHEETS)**
